

Disable WebGUI

#STEP1. Show the current settings of Remote Management:

```
DFL-210:/> show RemoteManagement RemoteMgmtHTTP
```

```
Name          Interface Network
-----
RemoteMgmtHTTP_1 any      all-nets
```

#STEP2. Disable the listed entry, and issue the command of "save".

```
DFL-210:/> set RemoteManagement RemoteMgmtHTTP RemoteMgmtHTTP_1 -disable
```

```
DFL-210:/> save
```

.....(omit system message, DFL is reconfiguring)

#STEP3. Issue the command of "activate" for committing the previous change.

```
DFL-210:/>activate
```

Enable WebGUI

#STEP1. Enable the listed entry, and issue the command of "save".

```
DFL-210:/> set RemoteManagement RemoteMgmtHTTP RemoteMgmtHTTP_1 -enable
```

```
DFL-210:/> save
```

.....(omit system message, DFL is reconfiguring)

#STEP2. Issue the command of "activate" for committing the previous change.

```
DFL-210:/>activate
```
