Blog

Create your own ShareCenter based customized blog using the ShareCenter's Blog add-on (Wordpress), where it can be accessed and commented on from anywhere with an internet connection.

You can install Blog through the ShareCenter's Add-On Management page.

Installing and Enabling Your Blog:

Click on the **Applications** button, then click **Add-On Management**.

Click **Choose File**, select the Blog add-on, and then click **Apply** to install the add-on.

After installing the Blog add-on, click its **Start button** (shown as a **green triangle**) to enable the add-on.

A **blue checkmark** indicates that the Blog add-on is now enabled and ready to use.

Launching Blog

The Blog icon should now be available under the **Applications** tab of the web UI. Click it to bring up the Blog Launch page.

Click Launch Interface to start using Blog.

The Blog Interface

Click on the **Log in** link in the bottom right corner of the page to open the blog administrator login page.

Hello world! January 1st, 2000 Welcome to WordPress. This is your first post. Edit or delete it, then start blogging!
