

Topology:

PC1-----(p1)DGS-3650(p2)-----PC2

How to block the user initiate a tcp connection from port 1 with ACL, but allow the client attached on the other ports to connect to PC1

Please run the following command

```
$create access_profile profile_id 1 ip tcp src_port_mask 0x00 flag_mask syn ack  
$config access_profile profile_id 1 add access_id 1 ip tcp src_port 0 ack port 1 allow  
$config access_profile profile_id 1 add access_id 2 ip tcp src_port 0 syn port 1 deny
```
