

We assume the Guest is connected on port 5. Everyday, only 2:00PM~6PM is allowed to access Internet, the other time isn't.

1.> Create a time range 2:00PM~6PM, from Sunday~Saturday.

```
config time_range TimeRange hours start_time 14:0:0 end_time 18:0:0 weekdays sun-sat
```

2.> create access profile, allow port 5 to access Internet (port 80) on the schedule. The others time are denied.

```
create access_profile profile_id 1 profile_name 1 ip tcp dst_port_mask 0xFFFE
```

```
config access_profile profile_id 1 add access_id auto_assign ip tcp dst_port 80 port 5 permit time_range TimeRange
```

```
config access_profile profile_id 1 add access_id auto_assign ip tcp dst_port 80 port 5 deny
```
